

PTA In-field Data Management Software System

Designed & tested by wastewater treatment experts
for professionals like you!

**TURN YOUR TIME
INTO MORE MONEY!**

A flexible and unique field service management tool

- **Compatible with all advanced onsite systems**
(Biofilters, Aerated Bioreactors, Low-Pressure Distribution, Drip Irrigation and others)
- **No more burden of managing paper files or complex databases yourself**

A smart and profitable investment into the future of your company!

Ready to Use

- Quick and easy introductory tutorials and guides included*
- Simple to fill-out checklist prepared by wastewater treatment experts for field usage
- Secure online access to a central database that stores your data
- No Wi-Fi connection needed to complete reports or attach pictures directly on the laptop – done right in the field!
- Personalized maintenance reports available

Efficient

- Structures appointments and To Do lists instantly
- Turns raw data into usable info by simple “plug-in” back at the office
- Transfers reports automatically to authorities websites/extranet (Health Units, SEO, DNR, DEP)
- Allows you to follow-up on the status of customer’s maintenance contracts and corrective solutions
- Permits access to information in real time for all stakeholders
- Makes maintenance reports available to customers

Guaranteed Savings

- No more papers to fill out
- Negligible additional costs to your service
- No more double entries by your office team members
- Quick overview of your daily, weekly and monthly priorities
- Automatic transfer of existing reports – no additional work for your team!
