Press Release

PREMIER TECH ENVIRONNEMENT becomes PREMIER TECH AQUA

Rivière-du-Loup, December 14, 2009 – Premier Tech Environnement, a business unit of Premier Tech, announced today, that from now on, it will be doing business as Premier Tech Aqua (PTA).

“Our growth on international markets was demanding an evocative name that could impose itself. “Aqua”, Latin for water, is a universal term that well reflects our product and service offering within our industry”, said Mr. Henri Ouellet, President of Premier Tech Aqua.

From a company commercializing a single product, the Ecoflo® Biofilter, mainly in the province of Quebec back in 1995, we have become a recognized leader in the Onsite and Decentralized Wastewater treatment industry for residential, commercial, community and industrial applications, thanks to a strong positioning of our products and services in North America, Europe and Asia.”

This new image and name change aims at affirming Premier Tech Aqua team’s dynamism, creativity and opening to the world, while consolidating the rich and diversified history of the company.

All about Premier Tech Aqua

Since 1923, Premier Tech has been building its know-how and reputation on the technological expertise and diversity of its 1700 worldwide team members. As one of its business unit for over 20 years, PTA has become an international and technological leader in Onsite and Decentralized Wastewater Treatment for the residential, commercial, community and industrial sectors. With more than 40 000 systems installed, each including a rigorous and documented inspection, maintenance and follow-up program provided by its network of partners, PTA is an uncontested leader in the industry. With offices in North America, Europe and Asia, it is proud of the proven and recognized quality, performance and reliability of its solutions.
