

## How to extend the lifetime of the filter

You can put off the replacement of your filter by following a few simple guidelines

### 1 Perform annual maintenance on the Ecoflo®

See the «Maintenance and warranty program» page

### 2 Pump out your septic tank periodically

The septic tank should be maintained periodically according to local regulations.

### 3 Follow the instructions

#### Avoid discharging the following substances:

- Oil and grease (engine oil, cooking oil...)
- Wax and resin
- Paint and solvent
- Petroleum products
- Pesticides of any kind
- Septic tank additives
- Any toxic substance
- Anything not easily degradable (e.g., coffee beans, cigarette butts, sanitary napkins, tampons, condoms)
