year
OF SUSTAINABLE
DEVELOPMENT

MAIN FEATURES

- Features adapted for passage through doors
- Wheels and handles are ideal for handling
- Lifting rings integrated into the body of the cabin
- Lock with key
- Easy cleaning (manufactured in one piece)
- Sewer network connection
- Ideal for civil construction and difficult access sites and areas without sewer connection

DIMENSIONS

790 mm / 990 mm / 1900 mm | Weight: 70 kg / 80 kg

FEATURES BOOTH WC

- Toilet paper support
- Toilet plastic / ceramic
- Chemical toilet / sewerage connection
- Injected toilet seat

FEATURES BOOTH SHOWER

- Shower, cold water
- Soap support
- Shower base with sewerage connection
- Door hanger

P Hand wash basin				✓
Q Water tank 8 L				✓

Available in blue and light green.

WORKING PRINCIPLE

1. Install it at the place of use and visually check the general condition.
2. Fill the WC tank (capacity 70 L) with 10 L of clean water and liquid sanitary additive or tablets.
Note: The chemical reduces odors and liquefies organic matter.
3. Adjust the dosage of the product in case of high temperatures or few cleaning service.
4. Fill the reservoir with clean water for hand washing through the upper hole (7 L).

5. When the WC tank is full, it will have to be emptied:

- Manually, to an authorized location.
- Pumped, directly from the WC tank to its own container.

Attention:

All discharges must be carried out in licensed areas and / or approved for this purpose, never in the nature.
