

The eco-friendly solution
that reduces your mains
water consumption

REWATEC[®]

Rainwater harvesters

Reduce your mains water consumption and your water bills

The conservation of water is becoming a growing topic in modern day society, with increased water consumption, increased water pollution and climate change all contributing to water scarcity.

Rewatec rainwater harvesters are ideal for conserving our precious water resource and for protecting our environment from the damaging effects of contaminated stormwater run off from your property.

Simple and sustainable, Rewatec rainwater harvesters are perfect for the collection, storage and re-use of rainwater from any roof type. They are installed underground and can be easily configured for home or garden use, giving you access

to abundant and free rainwater for any application that doesn't require drinking water for use.

With glass reinforced plastic (GRP) or or shallow dig polyethylene (F-Line) options available, our Rewatec rainwater harvesters can reduce your mains water consumption by up to 50%, save you up to 50% on your water bills and provide you with a solution to help protect our environment from the negative effects of stormwater run-off.

Outdoor use
