LEARN THE BASICS!

LIFETIME INSTALLATION

Ecoflo makes it possible.

Other septic systems filter wastewater through materials that are buried and inaccessible. When they eventually clog with sludge — as all systems do — you need to replace the entire system.

Ecoflo designs allow access to system components, including the sustainable filter.

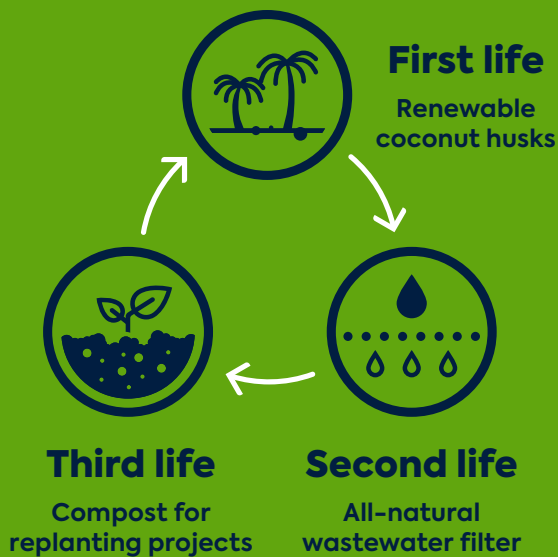

When the filter no longer treats wastewater effectively, we replace it with a new one.

You never need to replace your system.

BEST LONG-TERM INVESTMENT

- maintains the selling value of your property
- energy-free wastewater treatment
- no high-priced repairs or hidden costs

SUSTAINABLE COCO FILTER

LOWER CO₂ EMISSIONS

The filter materials for other septic systems often travel by truck.

Loads are small. Total CO₂ emissions are high.

We move lots of coco at once. And we do it with maritime shipping — the most carbon-efficient mode of transport.

ECOFLO[®]

Compact biofilter

The Ecoflo compact biofilter is ideal for homes and cottages with small lots, impermeable soils, or limited access.

Most models receive wastewater from your septic tank. They remove contaminants with a coco filter, then send wastewater downstream for further treatment or safe dispersal.

The results of your soil analysis determine the best model for your needs.

Advantages

- up to 50% smaller than traditional systems
- filter life expectancy is 15+ years
- zero excavation to replace filters

Features

- polyethylene, concrete, or fibreglass tank
- Pack models include septic tank
- possibility to integrate UV disinfection system

BIOFILTER WORKS

ONTARIO RESIDENTS

Make even more space for what you love

Summer pool parties? Evenings around the firepit? Whatever your dream, we make it fit. The Ecoflo compact biofilter with a shallow buried trench reduces the size of your drain field by up to 40%.

ECOFLO[®]

Linear biofilter

NEW FOR
2023!

The Ecoflo linear biofilter is best for homes and cottages with appropriate space and soil for a limited septic drain field.

The system receives wastewater from your septic tank. It removes contaminants with a coco filter. Treated wastewater then infiltrates directly into the ground below.

PEACE OF MIND

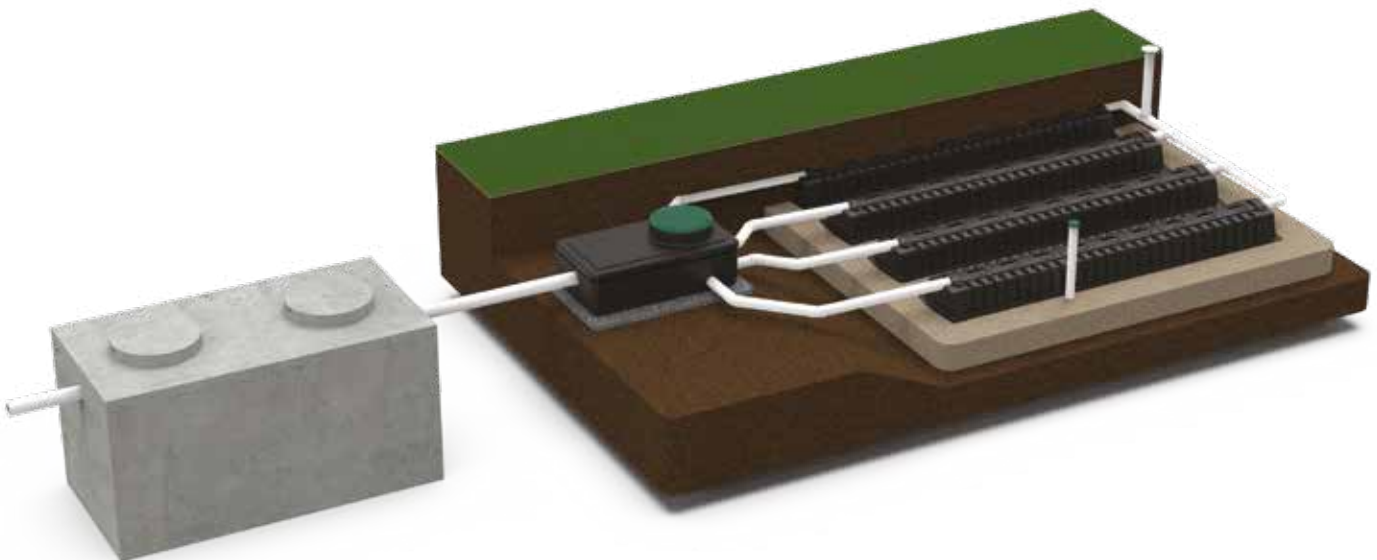

- zero-energy treatment
- 24/7 autonomous operation
- minimal maintenance

DISCREET INSTALLATION

- smaller than a traditional drain field
- integrates seamlessly into landscape
- noiseless and odourless

EASY TO REFURBISH

- filter life expectancy is 20+ years
- reusable hard components
- minimal excavation process

ECOFLO[®]

Free support for your project

Needing a new septic system can be overwhelming. That is why we offer step-by-step assistance to take your project from idea to installation, and beyond.

PRE-INSTALLATION SUPPORT

Our experts guide you through every step of your Ecoflo septic system project, including:

- site assessments and soil tests
- referrals to our trusted designers and installers
- permits
- installation

HOMEOWNER TOUCHPOINT

For Ontario residents

After installation, we contact you to explain the dos and don'ts of your new Ecoflo septic system.

We also:

- go on site to ensure proper installation of internal components
- check that your wastewater is being treated effectively
- answer any questions you have

Manufacturer support after installation

PREVENTIVE MAINTENANCE

Maintenance is an opportunity to identify components that need to be repaired or replaced. It is also a chance to correct small problems before they get more serious.

Advantages

- protects your investment in your Ecoflo septic system
- maximizes the lifespan of your system's filter
- ensures effective wastewater treatment for years to come

What you get

- maintenance visit by one of our trained partners
- detailed maintenance report
- analysis by our experts

FILTER REPLACEMENT

Changing the filter in your Ecoflo septic system is as good as getting a new system!

Our coco filter effectively treats wastewater for years. But all filtering materials eventually clog. When this happens in other septic systems, you need to excavate and replace the entire installation.

With Ecoflo, you replace only the filter.

Advantages

- takes just a few hours
- no or low impact on your landscaping
- renews the original warranty on your system's treatment performance

People and Technologies making a difference

Making a difference for our planet — for 100 years

At Premier Tech, People and Technologies have connected in lasting, transformative ways for the last 100 years, giving life to products and services that have helped to feed, protect, and improve our world.

We aren't slowing down. Premier Tech is 100 years young, and our experts continue to innovate and redefine what is possible through effective, efficient, and sustainable solutions. We are driven by our shared passion, and are committed to spend our next 100 years protecting our resources for the future.
