- **Oil Separators and Coalescing Filters**
- **Flow Measurement Devices and effluent monitoring equipment**
- **Site Surveys & CCTV**

Commercial Contracts

Visitor Attraction

An established amusement theme park on the south coast of England, attracting over 1.5 million visitors annually, faced significant challenges in managing its sewage treatment facility.

After 25 years of operation, the park's sewage treatment plant needed substantial upgrades to improve efficiency and reliability. The park management enlisted Premier Tech, a renowned provider of water and wastewater treatment solutions, to handle this complex project. Premier Tech were tasked with the following;

Future Proof the Facility

Install additional equipment and technologies to accommodate future growth and regulatory changes.

Increase Biological Reliability

Enhance the biological treatment processes to ensure consistent and effective sewage management.

Reduce Electrical Running Costs

Implement energy efficient solutions to decrease operational costs.

The refurbishment completed all requirements, notably saving the client an estimated £80,000 P.A on electrical

Premier Tech's expertise and innovative solutions were pivotal in transforming the sewage treatment facility of the south coast amusement theme park.

Through strategic refurbishment, state of the art technology installation, and continuous support, Premier Tech enabled the park to achieve its operational, financial, and sustainability goals, ensuring a cleaner and more efficient facility for years to come.

Let's talk about your project!

Nationwide Housing Association

Premier Tech work with a leading provider of social housing nationwide, who have a portfolio spanning over 200 sites.

Maintaining and managing off-mains drainage systems across multiple sites presents a significant challenge due to the diverse nature of properties and equipment involved. The housing association sought a reliable and experienced partner to ensure the efficient servicing, maintenance, repair, refurbishment and replacement when required of their drainage equipment to prevent disruptions and maintain regulatory compliance.

Recognising the critical nature of off-mains drainage system failures, Premier Tech provide the housing group with 24/7 emergency call-out services. This ensures rapid response times to address urgent issues and minimize disruptions to operations and residents.

Scheduled Servicing and Maintenance
Repairs and Refurbishments
Emergency 24-Hour Call-Out Cover

The implementation of the service agreement involved meticulous planning and coordination between Premier Tech and the national housing association.

Premier Tech's team conducted detailed site assessments to understand the unique requirements of each location and tailored maintenance plans accordingly.

Service schedules were synchronized with the housing associations operational calendars to minimize disruption.
